

RISHABH JAIN

Technical Artist

+91 8619244737 @ rjainzx@gmail.com artrishabh.github.io Rajasthan, India

SUMMARY

Passionate Technical Artist with a love for this role, expertise in Unity Engine, Optimization, VFX, Shaders, pipeline management, and tool development to enhance production workflows. Skilled in DCC tools, automation, and asset pipeline optimization to reduce costs and improve deliverables. Hands-on experience of supporting content pipeline of a live mid-core game - managing its content releases

EXPERIENCE

Technical Art Intern

Scopely

12/2025 - Present Bangalore, India

- VFX & Pipeline Management : Main VFX Artist for Toon VFX in Looney Tunes Art. Managed character assets ("toons") releases and asset bundles for same game's art pipeline within a waterfall production. Enforced strict pipeline standards across the art department, mentoring them on best practices for optimized deliverables and ensured proper github review to maintain branch health
- Tool Development : Authored custom Maya rigging tools that optimized internal rigging workflow, directly reducing reliance on external vendors and lowering overall costing. Made some photoshop automation scripts enhancing the manual iterative work of 2D Artists
- Workflow Optimization : Diagnosed and resolved a legacy text rendering issue, removing pipeline bottlenecks, saving animators a full day of manual work

Contract Game Developer

OVERDARE - Krafton

08/2025 - 12/2025 Remote, South Korea

- Developed and Released three multiplayer Games on OVERDARE platform by Krafton, a user generated content game platform
- Worked on contract directly from OVERDARE developer to expand their game catalogue
- Built game systems using Lua and OVERDARE's Engine

EDUCATION

Bachelor of Design in Game Design

Artemisia College of Art & Design

08/2022 - 05/2026 Indore, India
