SUMMARY

I'm a Technical Artist and Game Designer who loves making games that feel great to play. I have been making games from past 6 years having worked across shaders, VFX, and 3D tools. Most of my time goes into solving visual problems, optimising the scene and helping the game run smoothly. I care about how things look, feel, and respond when someone boots up the game

HIGHLIGHTED PROJECTS

Graycing

04/2021 - 05/2021

Game Developer and Level Designer

- A 3D mini-car racing game inspired by Micro Machines.
- Developed the game mechanics and designed the levels for it..
- A custom waypoint AI system with three difficulties.
- Black and White Shader for the Art Constraints of Game Jam
- Other VFX for Cars and Tracks

Statescape

04/2023 - 05/2023

Game Developer and Technical Artist

- Created a tool to automatically handle the depth of isometric assets without creating multiple layers in Unity
- Helped with Sprite Atlases to Optimise the Asset Size
- Optimized 2D Unity Lighting for the Scenes

Bean 'em All

08/2024 - 09/2024

Technical Artist and Level Designing

- Built an isometric rendering system with dynamic depth sorting for enemies, bullets, and props to maintain correct visual layering.
- Made some pixel perfect particle effects.
- Implemented hit flash and damage shaders for enemies, along with a screen shake combo for impactful feedback.
- Optimized sprite atlas usage and spritesheets reducing draw calls.

Nodesmith

09/2024 - 09/2024

Game Developer

- Designed a modular node and pin system with animated line rendering for clear visual logic flow.
- Built a UI blueprint canvas with smooth drag-and-drop interactions, snapping, and dynamic connection feedback.
- Developed a visual scripting-style interface that scales across levels, with animated transitions and intuitive feedback for player actions.

EDUCATION

B. Des. in Game Designing

Artemisia College of Art & Design

08/2022 - 07/2026 Indore, India

KEY ACHIEVEMENTS

#3 in IGDC x BYOG 2024

Our game "Nodesmith" won **3rd Prize** in the **BYOG Game Jam** at IGDC.

WAVES Summit Top 10 Games

Our game "Entwined Reimagined" was selected as **Top 10 Games** for **WAVES Summit 2025** held in Mumbai, and were invited to be the part of creatosphere

#2 Krafton's Invitational Game Jam

Secured **#2 in Krafton's UGC Platform - "Overdare" Game Jam**

Multiple Game Jam Victories

Have participated in over **20 game jams** and have won **6 IGDC Game Jams** and other several game jams.

SKILLS

Shader Graphs	Asset Pipeline	
Game Lighting	Optimization	
Collaboration - Git	Unity VFX Graph	
Level Designing	Basic HLSL	Rigging

COURSES

CS50: Introduction to Game Development

Completed Harvard's CS50: Introduction of Game Development, learning Scratch, Lua, Unity and other Game Design Principles

Voodoo Academy Training

Participated in Voodoo's Academy Training in 2025, which provided guidance to creating hybrid-casual games for mobile market.
